

# PLASTIC MULTI-PURPOSE ANCHOR SHARK<sup>®</sup> PRO

92

**The most versatile plastic anchor. Knots into cavities, expands in solid materials.**

**Ensures knotting in all hollow spaces and spreading in all solid materials**

- Anti-rotation device or twist lock prevents turning in the drill hole
- Patented anchor head causes knotting of the anchor shaft when the screw is screwed in

**Quick and easy assembly**

Low insertion torque and high fixed torque

**Suitable for cotter-pin and push-through installation**

- Fold-down anchor collar
- The hammer-in stop prevents premature expansion during push-through installation

**Resistant to rotting, weathering and ageing**

Made of high-quality polyamide (nylon)

**Halogen-free and silicone-free**

## Application area

### Universal plastic anchors

In concrete, solid brick, solid sand-lime brick, vertically perforated brick, hollow sand-lime brick, aerated concrete, plasterboard, gypsum fibreboard

### Suitable for mounting

wardrobes, curtain rails, wall shelves, lightweight wall cupboards, picture frames, mirrors, lamps, cable ducts, cable clamps, electrical switches, wash-basins, towel rails, information signs, motion detectors, etc.

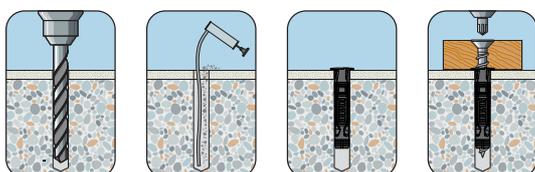

### For attaching components in conjunction with a wood or chipboard screw (without drill tip, counter thread, ring thread) (e.g. ASSY-D)

Can be used outdoors or in wet rooms in conjunction with a stainless steel screw

## Notice

For mounting, we recommend the ASSY-D plug screw

### Substrate: Concrete and solid brick

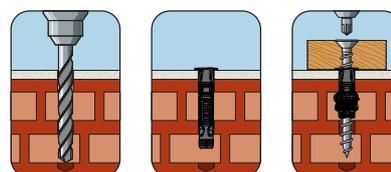

Drill the hole

Remove drilling dust from hole

Position the anchor

Screw in screw until flush

### Substrate: Hollow brick

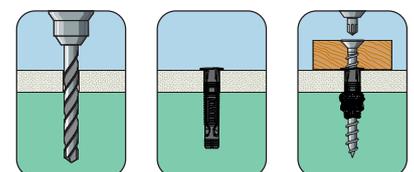

Drill the hole

Position the anchor

Screw in screw until flush

### Substrate: Gypsum plasterboard

Drill the hole

Position the anchor

Screw in screw until flush
