

Segmented Grinding Disks

General Working and Safety Precautions

- Clearly laid-out and proper storage of disks → dry, at +20 °C room temperature.
- Work may only be carried out with corresponding protective clothing, like goggles, gloves, work shoes and a dust mask.
- Grinding work may only be carried out with an appropriate protective hood.
- Using damaged disks increases the risk of accidents. Use only undamaged disks for grinding work.
- The permissible circumferential speed may not be exceeded.
- For free-hand grinding with electric or pneumatic angle grinders.

Applications

Materials	Material designations
Steel 	General construction steel High-strength construction steel Structural steel Tool steel Hardened steel
Stainless steel 	Stainless-steel sheets Non-alloyed stainless steel Alloyed and high-alloy steel Rust and acid-proof steels Chrome-nickel-steels
NF Metals/Aluminum 	Aluminum Aluminum alloys Copper Brass Bronze Other lubricating non-ferrous metals
