

EASY-FINDER SET

Contactless cable locator

The cable finder allows any technician to find any kind of cable, wire or wire pair in the shortest possible time without contact and without time-consuming stripping work.

- Search depth down to 60 cm (also when concealed)
- For locating cables and cableways up to 15 km
- For limiting cable disruptions
- Test cable, with fully insulated alligator clips, length 25 cm
- Test cable, with special RJ11 connector, 10 cm long

Application area

For use in electrical installation

For locating cables, interruptions and coax cables; for detecting short circuits.

For use in telecommunications

Testing voltage and polarity, detecting split pairs (core overdraw) and double cores (pairs), locating cables and interruptions, detecting short-circuits.

For use in data technology

For locating cables, patch fields and interruptions, detecting split pairs (core overdraw) and double cores (pairs), locating cables and interruptions, detecting short-circuits.

Notice

Always disconnect cables. Risk of destruction!

Art. No.	0715 53 750
P. Qty.	1
Transmission power (in dBm) at 600 Ohms	12 dBm
Transmission power (in dBm) at 50 Ohms	10.5 dBm
Output voltage	9 V/DC
Length of test cable	25 cm
Length of test cable 2	10 cm
Material of the housing	ABS, splash water protected
Number of rechargeable batteries/batteries	2 PCS
Rechargeable battery/battery permanently installed	No

Contents for Art. No.	Designation	Art. No.	Quantity
0715 53 750	Battery High Power	0827 115	2
