

COMBINATION WRENCH

Extra long

Design: metric, extra long design

- Drive: Ring side POWERDRIV® bihexagonal.
- Standard: DIN 3113A / ISO 3318/ 7738
- Material: chrome-vanadium-steel
- Surface: Chrome-plated, heads and ring polished.
- Geometry: Ring side 15°, angled down, open-end position 15°

The bihexagon on the ring side and the 15° open-end position are optimum in relation to the handle. This results in a minimal angle of rotation.

The 15° angle of the combination wrench enables more space for fingers or for overcoming obstacles.
