

Useit[®] Superpad SG

The fine-sanding disc for finishing and polish sanding of mineral materials (artificial stone), painted wood surfaces, filler, plastic and stainless steel, copper, brass and aluminium.

Fine-sanding disc with grid-like structure.

Your advantages:

- The sanding dust is vacuumed away completely from the entire surface.
 - No pinholing, no clogging, high sanding capacity, long service life, cool sanding, even sanding pattern, no formation of shadows on mineral materials.
 - Dust and shade-free operation.
- Shorter sanding time and effective working with a sanding capacity up to six times that of ordinary sanding materials.
 - Saves time and money.
- Can achieve extremely high gloss without polishing paste.
 - Saves time and money.
- Removal of dust inclusions.
- Ideal for wet and dry sanding.
- The Würth Superpad SG is universally suitable for use with any sanding plate (regardless of holes) - whether with or without dust extraction.

Carrier: Foam/grid fabric
 Grain: Silicon carbide
 Bond: Synthetic resin bond
 Adhesion system: Velcro
