blue	85	80	0585 27 80	5
blue	135	125	0585 27 130	2
blue	170	125	0585 27 170	2

Polishing sponge with Velcro fastener for machine polishing and cleaning of vehicle paints.

Conical pad edge

- Allows machining on edges and in awkward places

New type of foam rubber formula

- Increases the service life

Orange → soft and fine rubber

Use:

For easy polishing out of fine striae on fresh paints. Ideal for removing shadows and holograms with anti-streaking polish.

Blue → open-pore and abrasive foam

Use:

For rapid partial removal of fine sanding marks on fresh paints. Ideal for getting a high-gloss polish in polishing work on large areas, e.g. in used car preparation.

POLISHING PAD "WAVE"

Type	Dia. of pad in mm	Dia. of support plate in mm	Art. No.	P. Qty.
Black	130	125	0585 28 130	2

Extremely fine and soft polishing pad with Velcro fastener for the removal of micro-scratches and holograms.

Wave texture

- No splashing of the polish at high revolutions
- Low heat generation and a long service life

Areas of application:

For problem-free polishing out of micro-scratches and holograms on dark paints
