

ROUND SLING

Compliant with DIN-EN 1492-2

- Of high-strength polyester
- Endless loop
- High load-bearing capacity despite low weight
- Color-coded load-bearing capacity indication
- Woven-in barrel strips
- Various sling configurations are possible
- Protects surfaces
- GS-tested

Application

- Round slings can be used at temperatures ranging from - 40°C to + 100°C.
- Especially flexible sling for all types of loads.
- Thanks to their low intrinsic weight and their great flexibility, round slings have excellent handling properties, which is why they are used both in factories and at construction sites.
- Considerably less danger of injury compared to conventional carrying equipment.
