

## VEHICLE CURRENT TESTER

### For standard fuses

- Current measurement in automotive fuse boxes is often difficult with conventional multimeters because of contacting. The flat fuse current testers from Würth were specially designed to solve this problem. They are simply inserted into the fuse slot and immediately indicate the current in the fuse circuit. Since the fuse is inserted into the current tester while the measurement is being carried out, the measurement circuit is also protected during measurement.

<b>Art. No.</b>	<b>0715 53 090</b>
<b>P. Qty.</b>	1
<b>Max. nominal voltage</b>	48 V/DC
<b>Max. current</b>	20 A
<b>Cable length</b>	75 cm
<b>Length</b>	86 mm
<b>Width</b>	37 mm
<b>Height</b>	28.5 mm
<b>Number of rechargeable batteries/batteries</b>	2 PCS
