# Wash Stand and WC Attachment

**Wash stand attachment**  
M10; anchor Ø14x75 mm

**WC attachment**  
dia. 6; Wood screw DIN 95  
anchor dia. 8x40 mm

**WC attachment**  
dia. 6; hexagon wood screw  
anchor dia. 8x40 mm

## Proof of performance

### 1. Applications

#### Wash stand attachment ①:

- Any pressure-resistant solid stone such as chalky sandstone, solid brick, concrete and similar
- Any pressure-resistant hollow-chamber stones such as vertically perforated brick, pumice, perforated sand-lime brick. Here, the drill hole should be created without an impact, so that an even more secure hold can be achieved

#### WC attachment ②/③:

- Any pressure-resistant solid stone, such as concrete, natural stone and screed

### 2. Advantages

#### Wash stand attachment:

- Complete set with all required attachment pieces

- Can be used universally for all conventional wash stands and lavatory basins
- With adapted plastic centering piece for secure mounting

#### WC attachments:

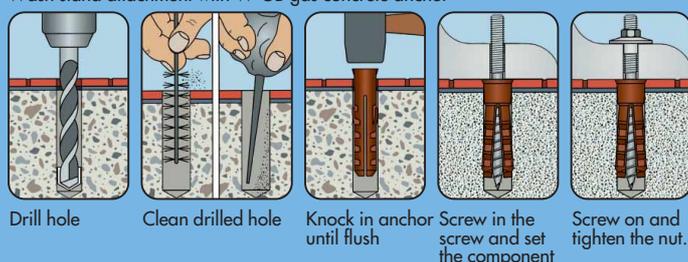

- Complete set with all required attachment pieces

### 3. Properties

- Unit matched to the available surface
- Anchors are made of high-quality polyamide (nylon)
- Anchors fully resistant to rotting, weather and ageing
- Resistant to chemical cleaners commonly used in washrooms

## Setting instructions

Wash stand attachment with W-GB gas concrete anchor

Wash stand attachment with nylon anchor
