

POINT CHISEL MAX LONGLIFE & SPEED

Art. No.	0647 861 400
P. Qty.	1
Length	400 mm
Tool holding device	Suitable for SDS-max

Application area

For general breaking-up and breaking-through work (spiking, mortising, knocking out, pounding, breaking open, breaking out etc.). For hard materials, e.g. concrete.

Premium next-generation point chisel with tool chuck suitable for SDS-max.

Optimised jam protection

The new chisel shape prevents jamming and reduces friction.

High removal rate

Self-sharpening design removes more material in less time and ensures a high removal rate across the tool's full service life.

Up to 170% longer service life compared to standard versions

Extended work area

FLAT CHISEL MAX LONGLIFE & SPEED

Art. No.	0647 862 425
P. Qty.	1
Length	400 mm
Width	25 mm
Tool holding device	Suitable for SDS-max

Application area

For general breaking-up and breaking-through work (spiking, mortising, knocking out, pounding, breaking open, breaking out etc.). For softer materials. Can also be used for marking masonry to be knocked out.

Premium next-generation flat chisel with tool chuck suitable for SDS-max.

Optimised jam protection

The new chisel shape prevents jamming and reduces friction.

High removal rate

Self-sharpening design removes more material in less time and ensures a high removal rate across the tool's full service life.

Up to 170% longer service life compared to standard versions

Extended work area
