

# 24 volt bulbs for Utility Vehicles

## Professional – One bulb for three different needs

In comparison to traditional 24 V bulbs, the Longlife +100% has the advantage, thanks to its "single-coil technology". It puts up to 100% more light on the road<sup>1)</sup>, which aids long-distance drivers' concentration considerably. The light cone, which is up to 40 m longer, helps drivers to see potential dangers faster and thus reduces response time. This bulb type also features increased vibration resistance thanks to its single-filament technology, yet still lasts twice as long.

<sup>1)</sup> In comparison to standard bulbs (dependent on headlight system).

### Your advantages at a glance:

- Up to 100% more light on the road, which means increased safety.
- Up to 40 m longer light cone.
- Double the service life in comparison to conventional 24 V bulbs.
- Increased shock resistance (heavy duty).

Fig.	Model designation	V	W	Base type	Art. No.	P. Qty.
A	H1 Longlife +100%	24	70	P14, 5s	<b>0720 111 21</b>	10
B	H3 Longlife +100%			PK22s	<b>0720 112 21</b>	
C	H4 Longlife +100%		75/70	P43t	<b>0720 110 21</b>	
D	H7 Longlife +100%		70	PX26d	<b>0720 114 21</b>
