

12 VOLT BULBS FOR CARS

Design-oriented

Xenonlight plus 50 is the next phase in the development of our "Xenonlight" halogen bulb line for design-oriented drivers who don't want to dispense with being actively safe. Thanks to a special coating process and filling with inert gas, the color temperature and light strength could be increased, lending the designer bulbs a plus point in the area of "active safety". The attractive double box is ideal for hanging or free-standing placement and features the dot classification system to make the advantages of the bulb (brightness, luminous range) stand out.

The advantages at a glance

- Up to 50% more light on the road for maximum safety
- Bluish white light relieves your eyes for fatigue-free, relaxed driving
- Improved view in poor weather conditions
- Optimal design with a silver cap (H4/H7) → Ideal for clear glass headlights
- Attractive packaging design for supplemental sales at the counter

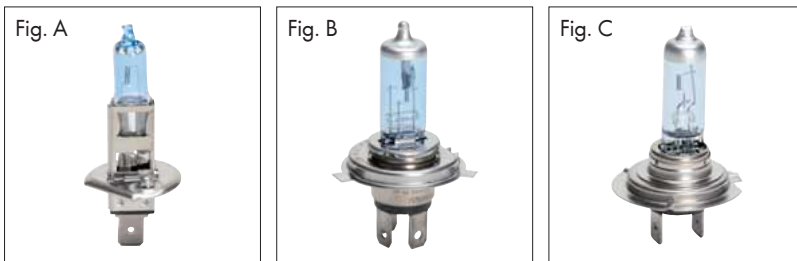

Fig.	Model designation	Volts	Watts	Base type	Art. No.	P. Qty.
A	H1 Xenonlight plus 50	12	55	P14.5s	0720 111 151	2
B	H4 Xenonlight plus 50		60/55	P43t	0720 110 151	
C	H7 Xenonlight plus 50		55	PX26d	0720 114 151
