Rechargeable battery/battery designation	Li-Ion
Number of rechargeable batteries/batteries	1 PCS

Application area

Depending on what its used for, it can be mounted or hung anywhere requiring warning lights, for example on the street, on a work site, on a car or on other surfaces. The LED warning lamp is water-tight and can be safely used for nautical purposes or in any other wet environment. Watertight up to a water depth of 1 metre. The warning lamp floats in the water if it is not fixed in position.

Notice

The device must not be tampered with. If the lamp is incorrectly assembled, this can affect its watertightness and damage the device.

Instructions

Using the magnet on the back: The LED warning lamp can be attached to vehicle bodywork or other similar metal surfaces. To charge the LED warning lamp, place it on the magnetic mount (observe correct polarity).
