

BRUSHES FOR ANGLE GRINDERS

BRAIDED CUP BRUSHES (STEEL)

0714 69 01

- For medium-heavy and heavy rust removal and deburring work or for removing slag from welding seams.
- Hardened steel wire, braided clockwise.
- For pretreating metallic surfaces which must be painted or coated. For use on all commonly available angle grinders.

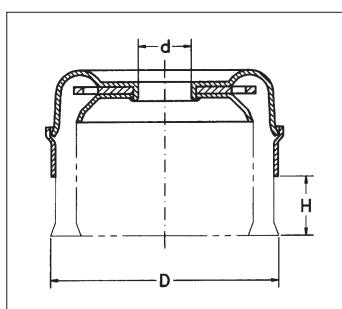

Steel wire						
D in mm	H in mm	d in mm	Wire dia. in mm	Max. rpm	Art. No.	P. Qty.
65	20	M14 x 2	0.50	12,500	0714 69 01	1
80	25	M14 x 2	0.50	9,000	0714 691 310*	1

* With support ring which is simply removed after free wire has worn down. Then another 20 mm of wire length is available.

BRAIDED CUP BRUSH (STAINLESS-STEEL WIRE)

- Stainless-steel braided cup brushes, braided clockwise.
- For treating stainless-steel surfaces.

D in mm	H in mm	d in mm	Wire dia. in mm	Max. rpm	Art. No.	P. Qty.
65	20	M14x2	0.35	12,500	0714 692 01	1

CUP BRUSH OF CORRUGATED STAINLESS-STEEL WIRE

- For machining stainless steel surfaces.
- For removing rust, paint, lacquer and dirt.
- For light deburring work.
- Enables flexible work on surfaces.

D in mm	H in mm	d in mm	Wire dia. in mm	Max. rpm	Art. No.	P. Qty.
60	20	M14 x 2.0	0.30	12,000	0714 692 015	1

Note: Always wear safety goggles and safety gloves when working with machine brushes!
