

EASYLOCK GREASE COUPLING

Art. No.	0986 004 001
P. Qty.	1

Application area

Compatible with all pneumatic, manual and electric grease presses with an M10x1 thread.

Hydraulic safety gripper nose-piece for all greasing work and maintenance tasks in vehicle construction, agriculture, building and industry.

Four hardened, tool-steel jaws

For secure grip and long service life of the jaws

High-performance hydraulic seal

For maximum service life

Integrated rotary joint with rule

Makes it easy to connect the Easylock grease coupling

Prevents leakage when disconnecting

The integrated internal spring and hydraulic shock absorber prevent grease from leaking due to jerks or impacts when disconnecting.

Can be disconnected at pressures up to 600 bar or more

External diameter in accordance with DIN 1283
