

DOUBLE RING WRENCH

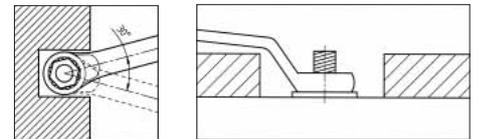

Version: metric, deep offset

- Drive: POWERDRIV® bi-hex.
- Standard: DIN 838/ISO 3318
- Material: chrome-vanadium-steel
- Surface: Chrome-plated, polished
- Geometry: offset on ring end 18°

Minimized outside dimensions, clear, rounded contours and smoothed edges characterize the narrow design.

Screw connections on deep-seated screws can be optimally undone thanks to the deep offset ring heads.
