

Color Pins

Coloured nails with barbed threads for permanent securing of wood and plastic.

Color Pins are available in the following colours:

Oak, dark	Maple	Rosewood
Oak, light	Black	Mahogany
Birch	White	Walnut

Color Pins Assortment 18x

These thin nails of high-quality steel are provided with a rugged colour coating. As a result, when the right colour is selected, the nail head is hardly visible after pounding in.

Color Pins are hardened. As a result, they don't bend when pounding in and can be pounded in easily due to their slim tips. Their barbed thread firmly and permanently connects to the wood fibres. Color Pins are especially suitable for securing battens, decorative mouldings and laths, quarter rounds, wood panelling, for producing furniture and frames, e.g. picture or mirror frames – of natural wood, wood lacquered with coloured paint and plastic.

Color Pins have a shaft diameter of 1.75 mm and are available in the lengths 25, 32 and 40 mm in 9 standard colours.

Art. No. 0964 479

Application

Joiner's workshops, furniture manufacturers, decoration, trade fair construction.
