

## 16 MM STRAPPING SYSTEM SPANNFIX

**The strapping can withstand extreme loads of 500 kg**

### Compact system

Quick and simple to use

### Five times lighter than steel strapping

Also ideal for use on the go

### Simple securing by hand or using the tensioner

- Easy re-tensioning when volume is lost in packaging
- Does not loosen, even during long storage periods

### Resistant to UV and weathering

### Largely resistant to chemicals

### Does not cause pressure points, scratches or rust spots

Strapping is gentle on products

### Strapping and clips can be used multiple times

Excellent value for money

### No sharp edges

- No risk of injury
- Adapts well to all shapes

### Application area

With the Spannfix polyester strapping, even large and heavy parts (pipes, scaffolding, wood, natural stone, palletised goods, etc.) can be strapped quickly and securely. The strapping is ideal for bundling all kinds of goods on the loading surface.

### Notice

**Impact loads may require a larger number of strapping turns.**

When lashing bundled goods on a loading surface, non-slip mats and lashing belts are required in order to properly secure loads.
